

NISHANTH UDAY NAIK

Mangaluru, Karnataka | +91 80735 93206 | nishanthnaik21@gmail.com | linkedin.com/in/nishanth-naik21 | github.com/Nishanthnaik21

PROFESSIONAL SUMMARY

AI/ML Engineering student with hands-on experience in Machine Learning, Deep Learning, Computer Vision, NLP, and Generative AI. Proficient in Python, TensorFlow, FastAPI, and RAG pipelines, with experience developing and deploying end-to-end AI solutions. Strong foundation in model development, API integration, and building practical, production-ready AI applications.

EDUCATION

B.E. — Artificial Intelligence & Machine Learning, St Joseph Engineering College, Mangalore 2023 – Present

CGPA: 9.18 / 10

Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, NLP, Data Structures & Algorithms, DBMS.

Pre-University Certificate (PUC) — Science, Shree Narayana Guru PU College, Mulki 2021 – 2023

94.5%

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, C#

AI / ML / GenAI: Machine Learning, Deep Learning, NLP, LLMs, Generative AI, RAG

Frameworks & Backend: FastAPI, Flask, Streamlit, REST API Development

Databases & Tools: MySQL, MongoDB, Git, GitHub, Docker

EXPERIENCE

IBM SkillsBuild Academic Intern — BharatCares (CSRBOX Group) | AICTE Jun 2026 – Jul 2026

- Build AI-powered automation solutions applying Agentic AI and workflow orchestration under industry mentorship.
- Collaborate on a real-world AI project aligned with UN Sustainable Development Goals.

Gym Management System — Freelance Client Project (Ongoing) Java | JavaFX | MySQL | JDBC | Maven

- Developing a desktop-based system to automate member registration, attendance tracking, and payments.
- Integrated MySQL via JDBC and designed an admin dashboard with automated report generation.

PROJECTS

HullGuard AI — Marine Hull Damage Detection System

Python | YOLOv8 | OpenCV | Streamlit

- Engineered an AI-powered marine hull damage detection system for automated defect detection and severity analysis.
- Built an end-to-end pipeline for preprocessing, damage segmentation, survival prediction, and Streamlit visualization.

Intelligent Missing Person Detection System (Major Project)

Python | OpenCV | Deep Learning | FastAPI

- Developing a real-time facial recognition system using ArcFace/ResNet50 to identify missing persons from live video.
- Implementing face embedding extraction, similarity matching, and FastAPI-based alert generation.

DIP Learning Simulator

Python | OpenCV | React.js | FastAPI

- Built a web simulator implementing 10+ digital image processing techniques with real-time visualization.
- Won 1st place in institutional Project-Based Learning competition (Apr 2026).

LEADERSHIP

Planning & Strategy Lead — Nucleus Club, St Joseph Engineering College 2026 – Present

- Led planning and execution of technical events by coordinating 35+ club members across functional teams.
- Increased student participation through structured event management and communication strategies.

CERTIFICATIONS

- Deloitte Data Analytics & Forensic Technology Job Simulation — Forage (Jun 2026)
- Experience the Future of Website Development with AI Workshop — Nucleus Club, SJEC (May 2026)

ACHIEVEMENTS

- Winner — PBL Competition, Digital Image Processing, St Joseph Engineering College (Apr 2026).
- Runner-Up — PBL Competition, Fundamentals of AI & ML, St Joseph Engineering College (Nov 2025).
